

AIWC Cage Cover Pattern

- This is a cover that hangs on the inside of the kennel door and has an attached flap at the top that hangs over onto the outside of the cage door.
- The material needs to be white and very thin to allow the maximum amount of light to penetrate into the cage (the lighter the color the better). The flap that hangs over can be any color and any pattern (see pictures below).
- The flap height should be approximately 10 cm. The length and height of the cover will vary depending on which kennel it is hanging from. Below is a table of all the different sizes we are looking for.
- We need three (3) more sets for each kennel door size. On the top right corner of each sheet flap please write the room number and the cage numbers that the sheet fits on. Eg. Room 2 #1,2,3,7,8,9.
